SUMMARY OF THE INVENTION

At page 3, starting at line 25, please replace paragraph (c) with the following amended paragraph:

(c) an assembly for extracting heat from the photovoltaic cell or cells, the assembly including (i) a housing positioned behind and in thermal contact with the exposed surface of the photovoltaic cell or cells, the ~~housing~~ housing including a base and side walls extending from the base, with the base, the side walls and the photovoltaic cell or cells defining a coolant chamber, and the housing including an inlet for supplying a coolant into the chamber and an outlet for discharging the coolant from the chamber, and (ii) a coolant member located in the coolant chamber in heat transfer relationship with the photovoltaic cell or cells, the coolant member including a plurality of elements of high thermal conductivity selected from the group comprising beads, rods, bars [[or]] and balls of high thermal conductivity material that are in thermal contact and have a large surface area for heat transfer and define a three dimensional labyrinth that can conduct heat therethrough away from the

photovoltaic cell or cells via the substantial number of heat transfer pathways formed by the thermally connected beads, rods, bars or balls and has a substantial number of coolant flow passages for a coolant that, in use of the module, is supplied to the coolant chamber via the inlet and flows through the coolant member and is discharged from the coolant chamber via the outlet.

DESCRIPTION OF THE PREFERRED EMBODIMENTS

Page 20, starting at line 24, please replace the paragraph with the following amended paragraph:

By way of further example, ~~whilst~~ while the preferred embodiment is described in the context of the extraction of heat from an array of photovoltaic cells that are contacted by concentrated solar radiation, the present invention is not so limited and extends to the extraction of heat derived from any source of intense radiation.
